## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-27, drawn to a method of increasing the binding of an oligonucleotide comprising a compound of formula II, classified in class 435, subclass 6.
- II. Claims 1, 28-32, drawn to a method of increasing the binding of an oligonucleotide comprising a compound of formula III, classified in class 435, subclass 6.
- III. Claims 33-59, drawn to a compound of formula II, classified in class 536, subclass 23.1.
- IV. Claims 60-72, drawn to a compound of formula III, classified in class 530, subclass 300, 333, 350.
- V. Claims 73-83, drawn to compound of formula IV, classified in class 536, subclass 1.11.
- VI. Claims 84-99, drawn to a compound of formula V, classified in class 562, subclass 553.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product

Art Unit: 1637

or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the inventions I can use the compound of Formula II or III.

Inventions III and IV; IV and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different compounds which are not related and therefore are directed to different species .

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
